

## IMAN NAZRI

[hye.imannazri@gmail.com](mailto:hye.imannazri@gmail.com) | [imannazri.com](http://imannazri.com) | [LinkedIn](#) | Kuala Lumpur, Malaysia

---

### SUMMARY

Product Designer with 4 years of experience specializing in Crypto & AI. Proven track record shipping features for millions of daily users across 25+ explorers. Excel in autonomous environments, delivering end-to-end design with minimal oversight.

---

### SKILLS

Design: Figma, End-to-End Product Design, User Research & Testing, Design Systems, Coded Prototypes

Technical: Basic HTML/CSS, Blockchain

---

### WORK EXPERIENCE

Product Designer | [Etherscan](#) & [Solscan](#)  
Jun 2022 - Present | Remote (Malaysia)

- Designed and coded **Etherscan MCP UI**, an MCP that enables block-explorer capabilities in ChatGPT and Claude.
- Designed agentic UX in **Blockscan App Agent** mode that helps user with their day-to-day multichain usage, such as managing users watchlist & analyze DeFI positions.
- Designed **Assets Tab for Address** page on Etherscan, enabling Multichain Portfolio tracking on 35+ chains, displaying holdings for multichain & Ethereum mainnet
  - Designed **Ask Etherscan** widget on Etherscan, an AI-assistant that enables users to chat in plain English, simplifying transaction and address analysis.
  - Designed **Etherscan Points**, a gamified rewards system to engage users through points mechanics, designing earning flows, points redemption UIUX, and pro feature redemptions (API Pro plans, Custom Address Page, Priority Support).
- **Cross-Chain Transactions**, aggregating bridge activity from multiple protocols into single table view and downloadable CSV data.
- Launched **Token Holders Visualizer** on Solscan & Etherscan, an InfoFI research tool enabling on-chain identification of whale wallets & trace on-chain funds.
- Designed **Transaction Flow Visualizer** for Solscan, displaying token flows and Program interactions through colorful diagrams for easier understanding.

Freelance Product Designer | Paperclip Labs  
2024

- [Ollio.xyz](https://ollio.xyz) - Designed the UIUX for Portfolio Tracker. Enables users to track their Compound V3 positions health, identify risks, and monitor liquidation points across several chains.
